

# Swamp reclamation in Uganda

## Problem statement

There is has been an increase in swamp reclamation in Uganda this is mainly due to the inefficiency of NEMA which has also most probably taken part in the land grabbing this has also led to the worsening of weather conditions in the country ie longer dry seasons which usually destroy property

## Objectives

- to Sensitize the public of the dangers of swamp reclamation
- to be able to identify a solution to the problem
- to learn about the causes of its increase
